

1. Color white parts of the dragon picture

2. Cut, or fold-and-tear, away this lower part along the black line so the part with the picture on it is a square.

3. Fold like a fortune teller (also called a cottie catcher). If you haven't made one before you can look up a tutorial, but the easiest way to learn is from someone who knows how. Ask friends and family or teachers for help.

4. Once all the folds are done, staple two of the sides together so that only the mouth will open.
